

Try three space adventures

Three actual coloring pages from Little Space Coloring Book. These nonconsecutive scenes show a star-flower garden, a rocket bakery and a little space train.

The paperback contains 21 different make-believe scenes in 24 pages at 8.5 x 11 inches. Its coloring pages are printed on both sides. Intended for ages 5-8.

Print the following pages at actual size on letter paper. Use crayons or colored pencils. The printed book is double-sided, so markers may bleed through to the next picture.

This is a free personal-use preview. Choose your own colors. The fictional space adventures are creative coloring scenes, not scientific astronomy lessons.

Which page would you color first? An adult can send page feedback to oddrulelab@gmail.com without sharing a child's name or other personal details.
